## Summary

---

Looking to apply machine learning related skills from research, personal projects, and school to industry. I'm a fast learner, willing to take initiative, and am willing to work remotely or in person while contributing to a positive work environment.

## Education

---

B.S. in Cognitive Science: Machine Learning & Neural Computation 2019-2021  
Minor in Computer Science & Engineering GPA: 3.6  
@ *University of California, San Diego*  
Supervised/Unsupervised/Reinforcement/Deep Learning, GAN, CNN, RNN  
Genetic Algorithms, KNN, K-means, EM Maximization, Bellmans Equation,  
Monte Carlo, Q-Learning, SARSA, N-step TD, Linear/Logistic Regression  
Computer Science/Visual Communications 2015-2019  
@ *Santa Monica College* GPA: 3.5  
Engineering Physics, Data Structures, Assembly,  
Typography, Color Theory, 3D Animation, Photography, Art

## Experience

---

Research Assistant Summer 2021  
@ *UCSD: Computer Science & Engineering*  
-Web Scraped social media using Selenium and then made inferences  
on users that were missing data based on mutual friend information  
-Designed logistic regression models capable of detecting hate speech  
on social media & used word embedding (Word2Vec) to bin dataset  
-Stored data and conducted queries in MySQL and MongoDB  
  
Graphic Design Internships Summer 2015, 2016 & 2017  
@ *Hotpoint App/Samuels Advertising*  
-Designed easy to understand one sheets for buyers  
-Designed geotags & for print typographical illustrations

## Projects

---

Snake Reinforcement Learning  
-Utilized N-Step TD and SARSA methods to play snake  
-Compared the two methods performance within small feature spaces  
-Made a custom gym environment and deep Q-Learning agent as well  
  
DJAI  
-Developed models to classify spotify songs by emotion  
-Developed another model to determine the mood of ambient noise in a room  
-Utilized both models to play music that fit a rooms mood  
  
cycleGAN  
-Modified a GAN in Keras to transform Classical music to Blues and vice versa  
  
Brain Wave Depression Classification  
-Analyzed EEG data of open/closed eye state participants  
-Classified participants as depressed or not by Alpha wave power

## Skills

---

Languages - C, C++, Java, Python, R, SQL  
Frameworks - Pandas, Scikit-learn, Tensorflow, Keras, Selenium, Seaborn, Matplotlib, NumPy  
Misc - Illustrator, Lightroom, Maya, Photography, Git, mongoDB
