Summary

Looking to apply machine learning related skills from research, personal projects, and school to industry. I'm a fast learner, willing to take initiative, and am willing to work remotely or in person while contributing to a positive work environment. I intend to further my education in a PHD or Masters programs on a timeline convenient to my future employer.

Education

B.S. in Cognitive Science: Machine Learning & Neural Computation	2019-2021
Minor in Computer Science & Engineering	GPA: 3.6
@ University of California, San Diego	
Supervised/Unsupervised/Reinforcement/Deep Learning	
Genetic Algorithms, Knn, K-means, EM Maximization, Bellmans Equation, Monte Carlo, Q-Learning, Linear/Logistic Regression, GAN, CNN, RNN	
Computer Science/Graphic Design	2015-2019
@ Santa Monica College	GPA: 3.5
Engineering Physics, Data Structures, Assembly	
Typography, Color Theory, 3D Animation, Photography, Art	

Skills

Languages - C, C++, Java, Python, R
Frameworks - Pandas, Scikit-learn, Tensorflow, Keras, Selenium, Seaborn, Matplotlib, NumPy
Misc - Illustrator, Lightroom, Maya, Photography, Git

Experience

Research Assistant	Summer 2021
@ UCSD: Computer Science & Engineering	
-Web Scraped social media using Selenium and then made inferences on users that were missing data based on mutual friend information	
-Designed logistic regression models capable of detecting hate speech on social media & used word embedding (Word2Vec) to bin dataset	
Graphic Design Internships	Summer 2015, 2016 & 2017
@ Hotpoint App/Samuels Advertising	
-Designed easy to understand one sheets for buyers	

Projects

Snake Reinforcement Learning

- Utilized DynaQ-Learning and SARSA methods to play snake
- Compared the two methods performance within very small feature spaces

DJAI

- Developed models to classify spotify songs by emotion, to then classify ambient noise into an emotion to determine the music to play to fit the room's "mood"

Brain Waves

- Compared multiple ML models for classifying resting brain waves as depressed

cycleGAN

- Modified a GAN in Keras to transform Classical music to Blues and vice versa
